

Hemlock Restoration Celebration

Friday, November 7th at 11:00 am

In the Hemlock Room of the Wellness Center

The CF Natural Resources Stewardship Committee (NRSC) invites you to celebrate the work of the Hemlock Friends Volunteers who have helped to restore the health of over 2,650 hemlock trees within Connestee Falls.

The [Hemlock Restoration Initiative](#) (HRI) will give a presentation about the value of hemlock trees and efforts to protect them from the hemlock wooly adelgid. Both the Eastern and Carolina hemlocks are integral to our ecosystems...to humans, wildlife, and the environment. Hemlock foliage is an important source of food and shelter in our forests, particularly in winter when hardwood trees are dormant.

Registration is appreciated but not mandatory to attend.

The on-line registration is available [HERE](#).
